AutoCAD can be used to create and edit two-dimensional and three-dimensional drawings, construct and model 3D objects, draft 2D and 3D graphic images and animations, and project and share 3D models. Among its key features are versatile vector drawing and editing tools that can convert a drawing into virtually any geometric shape, including curved surfaces and surfaces with variable thickness, as well as precise editing tools for curve and line segments, including direct editing of points and angles. Multiple layers can be used to separate visual and functional layers, and layers can be combined and separated via the Layers Manager. In addition to standard editing tools, AutoCAD includes powerful drawing and component tools, as well as an extensive library of drawing, annotation, and layout tools. A primary goal of AutoCAD is to provide the user with the most efficient and flexible means of creating 2D and 3D models. This is achieved by providing a standardized and unified interface, data exchange, and format, as well as a large library of building components and a powerful set of drawing and editing tools. The results of AutoCAD are 2D and 3D drawings, as well as assemblies and components used in drafting and building projects. Most CAD packages include 2D drawing and drafting tools, including straight and curved lines, arcs, circles, circles and ellipses, and polylines. While all CAD packages provide the user with a number of tools for drawing freehand, AutoCAD and other CAD packages typically include a number of tool extensions that allow the user to create more complex 2D objects. When used with AutoCAD, component technology reduces the need for 3D modeling, and a variety of 3D drawing and drafting tools are included. Although AutoCAD can be used to create and edit 3D geometry, AutoCAD is primarily used to create 2D and 3D architectural models. The 2D and 3D drafting components are shown in the following list. AutoCAD has developed a network of suppliers that develop and supply specialized drawing components that may be used in AutoCAD, such as components that model mesh, parametric, and surface curves. 2D Drawing Components Along with components, AutoCAD has a sophisticated collection of standard drawing and annotation tools. The following is a list of AutoCAD's most commonly used drawing tools and components: The basic drawing tool is the point, which may be moved with the mouse, or

The kick-off party is tonight and the b-ballers are planning to provide entertainment for the fans and media covering the event. Cannonball and the Krunk Crew are offering a 7 p.m. on-field open practice with the pros. Fans can meet several of the Galaxy players, have their pictures taken with some of the pros and even purchase team merchandise. The second event will be Thursday at the El Capitan Theatre where eight of the most popular Galaxy stars will take part in a question-and-answer session with fans and media. I hope that this one works out better than the Dome the Dome giveaway, which fell far short of expectations. While it might not be an apple to your eye, the Galaxy needs more giveaways like this if it is going to compete with the more profitable teams in the league. Read Next In

44 U.S. 549 (1845) 3 How. 549 JOHN FRANKLIN, PLAINTIFF IN ERROR, v. WILLIAM D. CONKLING, DEFENDANT. Supreme Court of United States. *550 It was argued by Mr. Niles, for the plaintiff in error, and Mr. Bibb, (Attorney-General,) for the defendant in error. Mr. Justice CATRON delivered the opinion of the court. In this case we have before us the fourth charge of error, which presents the question, whether the court erred in overruling a demurrer to a supplemental petition in the declaration. On the 10th of June, 1841, the plaintiff, as owner of the brig Lina, sold it to the defendant, for the sum of \$3,000, at Charleston, and the said vessel was delivered to the defendant on the 3d of October following, and at the same time the defendant agreed to pay the plaintiff the money for said vessel, one-half of which sum was payable in cash, the other half being payable in cotton, and on account of the cotton to be deposited by the defendant in a bank, until it was sold and the price of the cotton deducted, and he, the said defendant, did then and there give the plaintiff his bond to the amount of the debt, with sureties to be approved by the court. The plaintiff deposited with the defendant the bond, or its
