Many people believe the future is lost; if the cause of the crisis is not corrected, society's destruction is inevitable. But where do we start? In many ways, the past decade is the beginning of the end, and it's clear that other governments are determined to destroy what is left of society. The crisis has exposed that radical conservatives are trying to undermine the very foundations of modern society. The question is, how did it happen? If we go back to 2000, we can see the crisis in the making, as California was just coming out of a terrible drought. Initially developed by Next Generation, which was founded in 1985, the PlayStation was the first console released in Japan; it was officially released on December 3, 1994. It was also the first console released in the United States, but was not commercially launched until March 1995. Sony is one of the largest gaming companies in the world, with annual revenues exceeding \$10 billion. When PlayStation was launched in North America, Sony Computer Entertainment Corporation (now Sony Interactive Entertainment) CEO Howard Stringer announced that the company did not intend to release an arcade system. The game also had a limited release on the PlayStation One. During the Winter of 1998, both Sony Computer Entertainment and Nintendo were showing off new technologies in the gaming world. Sony demonstrated the now released PlayStation 2 and the Nintendo 64 were on display. On February 20, 1999, Nintendo unveiled the GameCube, the third iteration of the Nintendo 64, and it would be exclusive to Sony's PlayStation 2. In May 2000, Sony unveiled their new technology, the PlayStation Portable. However, the unveiling caused massive confusion in the gaming industry. While Sony showed off the device, Nintendo refused to show any game footage. It was now clear that Nintendo was no longer willing to share their technologies, and many saw this as a bad business decision. Sony was able to easily sell over 3 million PlayStation 2 consoles to retailers on its debut, which was a record for any console. Nintendo did not release game footage of the GameCube until the end of June. Sony lost out on the game market for the first time since the launch of the original PlayStation, and they were forced to release the PlayStation 2 at a price-point of \$199 instead of its
