The results of this unprecedented digital match simulation will be revealed in August. “I am proud of FIFA 21 for many reasons, including the fact that it is the deepest and most authentic game of football ever released. However, FIFA 22 has already exceeded this achievement, as we were able to capture even more precise player movements by integrating motion capture data from 22 real-life players during a complete, high-intensity football match,” said Peter Hervé, Chief Executive Officer of EA SPORTS. “As the technology was never seen before, this has allowed us to significantly improve gameplay in the key areas of dribbling, shooting, passing and tackling. FIFA 22 is truly a landmark FIFA title that will prove to be a true benchmark for future FIFA titles.” Ahead of the title reveal tomorrow, we have a copy of the new title for you to check out. Unfortunately, it's playable on PC only for now, but you can view a close-up screen (with many details blurred out) below, courtesy of EA. We'll have further details on FIFA 22 when its reveal at the EA PLAY conference tomorrow morning. We've also prepared an exclusive interview with EA about FIFA 22, where we discuss how EA is bringing this new, hyper-detailed game to life. As usual, check out the new excerpt below, and for more, you can read the full article tomorrow. *** 2014 and 2015 have been an incredibly significant years for FIFA. While EA has never failed to deliver quality football games, the releases have seemed bogged down by restrictive mechanics, unrealistic physics and ultimately, poor player animation. For several years, FIFA's players stumbled and fell in front of goal, reacted unnaturally to the ball, and simply did not move with the fluidity and speed we've come to expect. The head-turning jump to virtual reality set out to change all that, bringing the beautiful game of soccer to life through the eyes of the player. Based on the player's head, hand, and foot tracking, players react with greater animation and fluidity, and the ball reacts more realistically in physics. Dynamic weather conditions replicate the experience of playing outdoors in all weather conditions, and there are new "Play Styles" that let you play the way you think you would. EA SPORTS FIFA 17 on Wii U. We used FIFA 22 to take a close look at some of the biggest improvements in motion capturing technology that will appear in
