Pneumatic Steerings You'll Love With our innovative pneumatic steering system, your rear wheels are coupled to a 20 pound per square inch air cylinder which adjusts to the surface conditions. Tracks That Last The flooring is composed of high-grade polypropylene carpet and durable vinyl tile, while the seat features a seven-way power recline, a height-adjustable footrest, and a six-position memory position. Most panel trucks use solid rubber tires with a steel rim. The rim is typically 3.5 inches in diameter with four mounting holes to accept the tire's bead. On most trucks, the bead of the wheel is held in place by a wheel cap with a threaded bolt. The bolt passes through the wheel cap and into the center of the bead of the tire. This wheelcap is held in place by a pin in the wheel cap which goes into the center of the bead of the tire and a washer and lock nut which keeps the pin in place. The washer and nut hold the wheel cap in place on the bead of the tire. These two nuts are typically large and the lock nuts are accessible. Exterior Wheel Repair Steps Exterior Wheel Repair Steps 2) Apply Loctite blue to all the lock nuts (if lock nuts are missing, use a heat gun to hold the nuts and wedge them into position). 3) Disengage nuts and turn inward. 4) Turn out car to where nuts do not interfere with normal driving. 5) Drive cars until the tires blow. 6) Locate brake drum or wheel, remove wheel and drum. 7) Check for wheel lug nuts, tighten them (loctite and tool) if necessary. 8) Replace wheel and lug nuts (loctite and tool). Differences in Wheel Size Wheel size refers to the diameter
