16.2 KB 68 BCH FileCleaner lite What is FileCleaner lite? FileCleaner lite (FCLlite) is a free, lightweight utility designed to help you clear out files that are unnecessary for you or your PC. Depending on the application, the app can clean and remove such files as temporary and temporary internet files, internet cache files, history files, cookies, leftovers from downloaded games, game patches and extra files from various programs and app that you installed manually or automatically. The

application runs smoothly and is easy to use: after launching FCLlite, the program prompts you to select the Steam directory which is the main location of Steam data and other users' files that you can clean up and delete. Moreover, you can specify the clean options including files, temporary and temporary internet files, cookies, cache, browsing history, log files and others. The program can analyze various files including, but not limited to, appcache, unique.css, DotNet, MDMP,

minidumps, screenshots, JavaScript files and all other files present in the Steam application folder. What's more, the app can automatically detect and list all your Steam data files and makes it easy for you to delete the ones that you can or can't use. In addition to this, the program can delete files from your hard disk as well. FileCleaner lite gives you a somewhat less convenient way of cleaning files but is still worth using for those who prefer an old school approach over the one offered by Steam. How can

you use it? After you launch FCLlite, it opens a user-friendly interface where you can choose the clean options. More precisely, the tool can analyze cache, log files, script files, crash dump files, system cache, HTML files, and other files available through Steam and display detailed information about your PC. Once you specified the clean preferences, hit the Clean button and when the results pop up, you can delete the ones that take up space. In addition,
