Agent Awesome puts you in the middle of the action, where you can enjoy the full weapons arsenal and leveling, and kill anything that stands in your way. 12 levels with a twist. Use stealth or fight your way through and eliminate all the middle management. Many upgrades: in between each level are items to unlock and upgrade. Back to top Recommended By Curators Reviews Reviews "Agent Awesome is a blend of tower offense and stealth games, a really rewarding mix that isn't easy to master. Just because it features two very different genres doesn't mean it's a simple game, but if you know how to play the different levels wisely you'll have a good time." — Kotaku "A fun, fast-paced game where you can switch between stealth and combat as needed. I love games like this, because the action-stealth combo is something we don't see in many games anymore." — PCWorld "Chundos has created an endlessly entertaining game." — Game Trunk "Agent Awesome is really a lot of fun, if you know what you're doing. (On PS4 and Xbox, you have to find the secret 'Agent Awesome' button to unlock certain levels, so be sure to find it before you start playing.)" — Game Informer "Agent Awesome is a lot of fun if you're willing to be patient, and you can use the ability to switch between a stealth or combat approach to take out your enemies." — IGN About This Game Agent Awesome -- a brand new strategy game for PC and Mac -- is the debut title from Chaos Industries. As Agent A., you must use your tactical expertise to plan the perfect strategy and storm through the building of your former employer, Engineering Vicious Ideas Labs (E.V.I.L.). Each of the 12 levels has been designed with both a combat and a stealth approach in mind -- and both styles bring the same rewards. Agent Awesome offers deep tactical gameplay that mixes elements of the tower offense and stealth genres. Play as the title character who -- after a night out with his pal, Michael Anger -- gets drunk-dared into showing he is the ultimate badass by storming and eliminating all the middle management of his former employer, E.V.I.L. c9d1549cdd

Dozens of its people killed, and over 30 injured, including an American citizen wounded in the leg, after several explosions rocked a suburb just outside Washington on Saturday evening, police said on Sunday. Police warned residents to remain inside because "multiple" bomb blasts had been reported in the neighbourhood in the southwest of the capital. "The explosions happened within a one minute span and we believe they were explosive devices," U.S. police's special operations spokesman, Ed Beto, told AFP. One explosive device went off at 8:53 pm on the sixth floor of a home and another almost simultaneously close to a home, he added. At least one building was damaged, though it was unclear whether it was struck by the bombs. It was the third incident of explosions reported in the same area within the past 24 hours. The U.S. capital has seen a rise in violent incidents targeting local residents in recent months. At least 19 people were killed in a shooting at a Maryland shopping centre on June 28 and US officials say investigations are in the early stages into that attack. A man was killed Friday in a bank robbery in the same Massachusetts city and three people were shot to death in Georgia last month, police said. - **Install: Just double-click setup.exe and an installer will appear. Ignore anything except the 'Software Installation' button. After installation, most games load into your 'My Documents' folder. If they don't, go to the game installation folder itself and look for the folder name (usually Program Files, DirectX, etc). Sometimes it's Program Files (x86), sometimes (Win98) or maybe Program Files (Windows NT). Allow everything on the installer to install and then copy all the contents of the 'Games' folder to the 'My Documents' folder of your PC.**
- **Run: Bepuzzled Jigsaw Puzzle: Animals 103 Puzzles.exe (or the setup.exe for Windows Vista & 7). Once the setup is finished, press the 'Next' button and you will be asked to activate the program. Press the 'Next' button, accept the various licenses and press the 'Finish' button.**
