In addition to the above, there are also the skills of the individual character and character interaction, and the battle system that revolves around them. ■ **Battle System** It is a battle system where you can freely and intuitively enjoy battle thanks to a series of fun actions, such as dodging and blocking. ■ **Battle Time** As the battle progresses, battles are triggered in real time. ■ **Character Flow of a Battle** The direction of the battle changes for every action, while the target changes as the battle proceeds. At the same time, a tension of preparing for battle and taking the initiative to intercept attacks builds up, and the battle turns into a game of “surprise attack”. ■ **The Relationship Between the Characters** During battle, the perspective of the characters starts to move in parallel with the opponent’s movements. This makes it possible to see the appearance of enemies from various angles. It is also possible to readily guess whether your attack was successful. ■ **Half-time and Full-time Control** You can freely control the activity of your character during half-time, while during full-time, you can freely control the actions of your character, such as performing an ordinary attack, transforming yourself into a motorcycle or knife, or taking advantage of the elements. ■ **Use and Abilities of the Characters** Characters will gradually grow in power by using items and abilities. You can freely combine the weapons, armor, and magic that you equip. You can develop your character according to your play style, such as increasing your muscle strength to become a strong warrior, or mastering magic. ■ **Skills of the Characters** Through the combination of the skills that you have learned, it is possible to learn new skills. Skills can be freely combined. Depending on the combinations, the characters can change their roles. ■ **Characters and Environments** Characters can transform their appearances and skills by coming into contact with objects or people. In addition, the characters can develop their skills through interaction with characters or the environments. ■ **Strategy in Battles** In addition to this, there is a strategic element to battles. While a fight between you and the enemy team is happening, as the battle progresses, a reaction is triggered depending on the

actions of your opponent. ■ Character Development In addition to the skills and special abilities that have been developed through experience, there are also “notch” items that can be equipped to increase your abilities. ■ Characters - Josh Artorius
