Need more info, let me know!. on the rescue or repair 7-Zip.CLIMATE CRISIS: CO2 levels at 415ppm; global economy and 3.5C warming inevitable – study By Derek Wall There is a "90% chance" of no global warming below 2C, and high probability of more than 3.5C warming in the next century, according to the first serious study of what would happen if governments can't agree on urgent cuts to CO2 emissions. The Independent has obtained what it calls "a first draft" of the study and notes, "Only a very small fraction of the world's scientists have access to it yet, but even the authors are sufficiently worried to call it "uncomfortable reading"." [See update below] The paper, penned by a small group of British and American scientists, is the culmination of years of painstaking research. It has been commissioned by a major anti-
