There are a number of options that allow you to apply a variety of effects to text. These include, :

- Font Details Change the font of an entire document with one command.
- Find & Replace Find and replace text, delete text, add text, or change the case of a block of text.
- Text Wrap Let text flow automatically to the right, left, and center.
- Text Auto Color Change the color of text automatically depending on what's in the background.
- Transform Effects Transform text in a variety of ways.
- Highlights Highlights highlight areas of the image for special effects. Note: These are effects that are frequently used by designers and photographers.

Photoshop is not a replacement for a good image editor! Using the History Can be used to undo or redo edits, apply or remove a filter, or undo various changes to an image. Viewing History Enable the History panel by choosing Window from the View menu. Using the Filter Panel Select Filter > Filter Gallery > Blur > Gaussian Blur. Using the Layer Panel Create a new layer by pressing Command/Ctrl + N. Using the Control Panel Click on the control panel tab by choosing Window from the View menu. Using the Crop Tool The Crop tool is found on the Tools panel or in the Tools > Crop box. There are two main uses for the crop tool. One is to remove portions of an image. The other is to move, resize, and rotate an image. Drag a selection boundary or feature on the image, such as a line or circle. Photoshop will automatically crop the image to your selected boundary. Now let's examine how to use the Crop tool to make an image larger or smaller. In the example below I will be cropping a photo: To crop an image click on the Crop tool. The tool will be added to your toolbox. Choose one of the options in the right-hand area. To make the image larger: drag the boundary inward. To make the image smaller: drag the boundary outward. The new size will be reflected when you click OK. Now let's examine how to use the
