Datuks.Whats up guys, i just came across this area post and truly wanted to tweet but dont seem to have anything to publish, I was in fact looking to create an assessment on kopi c:.To start with, you want to use a bootable USB flash drive or CD to boot from. You need to use a XP system for this and the free and open source program Rufus works for it. If you try and run a Windows 7 boot disc, there will be problems as Windows 7 does not allow you to load from a bootable CD or USB, instead you will need to do the whole install thing that Windows 7 does not allow you to do. Once you have created the bootable CD or USB, boot your computer with it. Boot from LiveBoot on the Boot Menu should already be pre selected and will automatically launch in a few seconds.Wondershare LiveBoot 2012Wondershare LiveBoot 2012 is a WinPE version of Windows 7 Ultimate 32-bit with network/internet connectivity and Internet Explorer 8. It also includes a number of Windows tools which you normally find in Accessories in the Start Menu; Calculator, Command Prompt, Computer Management, Disk Cleanup, Regedit, Remote Desktop, System Restore and a few more.The real heart of the system is the LiveBoot 2012 frontend application which gives access to a number of repair, recovery, management and maintenance tools and guides which can help with a range of issues you might be having. An alternative way to launch any of the separate LiveBoot tools is via the Start Menu. Heres a rundown on whats available.
