Ejay Animation Studio is a visual music sequencer and VJ-Box. It's similar to Ableton Live. Create a track of any amount of different sounds and layers. Edit video with yourself and add 3D renderings of you and your track. Apply your own visual effects. When you are ready, add your music video to the track and to YouTube. Share your creations with the biggest social networks! Some experienced users may have used audio analyzers such as Rec-Forms, HousePAC or other software that allows the identification of MIDI files (.mid), and will know what we mean when we say that ejay House 6 Reloaded is a MIDI sequencer. The function of the software is to analyze and translate various formats of MIDI files into WAV to MIDI, and vice versa. The fact that this script is simply MIDI sequencer, doesn't prevent users from creating loops or single songs. Overall, ejay House 6 Reloaded ensures that your work comes across professionally in studio quality. With the ejay Loader, you can do more than that, and this means that it can be seamlessly integrated into your workflow to help you save time and be more productive. For example, you can load tracks or loops by simply dragging them in, or simply by adding them to a playlist. The interface is super-simple, so it won't take you much time to learn what you have to do to save and create loops or tracks. But, you have to know that the number of tracks you can create, the amount of metadata you can add, and the amount of licenses you can keep are all limited. There is also no direct way to sync your work with ejay House 6 Reloaded.
