## Witch It V0.6.0.2 Fixed Fitgirl Repack

Twitch is a live streaming video platform which primarily focuses on video game live streaming. As with all other video streaming websites, there are a number of social interactions that take place, such as chatting between individual viewers. Better TTV for Chrome is a neat extension for the Google Chrome browser, which enhances the already rich chat features that Twitch has to offer. This extension does not interfere with your Twitch experience in any harmful way, so you don't have to worry about things like video interruptions or not working at all. Among the features that this extension has to offer we can mention anon chat, the ability to blacklist or highlight words and phrases, recent chat history on chat load. The chat features are further enhanced by the addition of custom chat emoticons, the ability to show or completely remove deleted messages, embedded strawpolls, improved emote menu. As with all video games and videogame-related content, there will always be trolls and general toxic people. Fortunately this extension allows you to ban all users with /massban. Another anti-troll feature is the chat image link previews on hover & Speed Boost: When you switch your device to secure Wi-Fi mode, Wifi Boost shows you how much faster the connection is when it's encrypted. Device Manager - Device Manager for PC applications to view a complete list of your hardware, Software & Drivers, and errors. This system is very useful. With an Ethernet or wi-fi connection, you can look at what's wrong with your modem, your router, and even your ISP before you start troubleshooting. That prevents spending a lot of time trying to figure out the problem and fixing it. Fast Start - Fast Start enables you to boot your computer in four seconds or less, without switching to Safe Mode. If a kernel driver fails to load properly, Windows automatically starts System Restore.
