A: There is no way to answer this without you specifying which .bin file you are trying to use. Is that a torrent file? Is that a (zip) file? You could try opening the .bin file using 7Zip or WinRAR, although it is not necessary to find out which .bin file is right. There is a tiny chance that the file could be corrupt, which is also a reason to use them. The last resort is decompiling it, but you then risk messing up your computer.
