V. I. Lenin (15 November 1870 - 14 January 1924) was a leading figure of the Russian Revolution, and the first leader of the Soviet Union. An important Bolshevik leader, Lenin was a lifelong revolutionary and a prominent communist, who played a key role in the creation of the world's first socialist state and the Soviet Union. Born Vladimir Ilyich Ulyanov, he was the eldest son of a wealthy, working-class Russian merchant. After the premature death of his father, he was adopted by his mother's family and renamed, Vladimir Ilyich Ulyanov. He joined the Russian Social Democratic Workers' Party (RSDRP), and was involved in radical activities in the years leading up to the Russian Revolution. In 1901, he became secretary to the RSDRP Central Committee, but did not take an active part in its work. After the 1905 Revolution, in which he supported the revolutionaries, he was arrested and spent a number of years in prison. After release, he concentrated on revolutionary activity and joined the Bolsheviks, or Communist Party of Russia. Lenin led the Bolsheviks in the 1917 October Revolution, which brought about the Russian Communist Party's seizure of power and its establishment of the world's first socialist state, the Soviet Union. Lenin served as first secretary of the Communist Party of the Soviet Union until his death, and ruled with an iron hand, exerting control over the country's political and military activities through a series of revolutionary and militarist periods. Lenin died in 1924, and was succeeded by Joseph Stalin. During his leadership, the Soviet Union suffered the Great Purges, economic and industrial stagnation, and later the Stalinist regime. The Soviet Union, along with China, is the only one of the original four communist countries to have survived to the present day.
