application is free to download. FlexTunnel is a client for HTTP proxy servers that can be used to achieve Web page security and Internet access for Windows mobile and Android devices. The software creates a virtual connection between the mobile device and the Internet, which is in direct contrast to the intended purpose of most proxies that provide access to the Internet. Using the software you can control the use of the Internet on your mobile device. You can block

unwanted Web sites, only browse certain Web sites, etc. FlexTunnel is easy to use and can be configured in a few minutes. The Game-Finder is an application that allows you to easily access a huge collection of entertainment software for Windows. This application is very easy to use and it has a simple, clean interface. The software is not only packed with entertainment software for Windows, but also covers other topics such as Sports, News,

Educational, etc. With the Game-Finder you can get to over 140 different categories. Within each category you will find everything from games to software and tools. Additionally, the software provides you with information about each game and software, so you will be able to decide if the software is worth purchasing. The Game-Finder was built by a group of volunteers that loves games and entertainment software
