What's New In VersaBar?

VersaBar is a free Windows95/98/NT/2000/XP program that allows you to create your own barcode, graphical labels and text. It's the simple way to mark your handwritten notes, documents, or projects in color or black. VersaBar is ideal for graphic artists, or anyone who wants to create their own

customized barcodes, labels or text. The information can be exported to any Windows application, including MS Word and excel documents, as graphic files. VersaBar will let you create your own customized barcode, labels or text, which can be used to keep track of your projects, or mark your handwritten notes and documents with your own style. Features: View of the screen is completely customized and can be moved to any position and size. The whole screen can be used as a barcode editor. You can add your own fonts, change the font style, adjust font size, and modify the text You can set the background color of the bars and text to any color. The character spacing, barcode width and height can be adjusted freely Control barcode edges, barcode letterboxing and alignment. Generate a barcode image or print it to the printer. The barcode image can be saved as a GIF file. Export a barcode image to other applications such as MS Word, Excel, or PowerPoint. Export a barcode image as a graphic file. Import a graphic image file into the barcode editor for editing. It is easy to use and you can edit, save, open and print the barcode image file. VersaBar can help you to make your work easier and save time. The barcode image can be converted into a graphic, JPG, BMP, and GIF file. When you want to print barcode or labels, you can choose to print to printer or export to various applications. System Requirements: Windows 98/2000/XP/Vista, Intel Processor 100MHz 450MB Free 100MB Review: VersaBar is a pretty cool program. Its simplicity makes it perfect for anyone who wants to add a little bit of flair to his or her bar code and label making. I was impressed by the ease of use and quality of output. Conclusion: VersaBar can dramatically improve productivity and accuracy for any business. Bar coding is a proven technology for inventory control management and can eliminate costly keyboard data entry errors. The program allows you to specify the parameters of the barcode, it generates the image and allows you to copy it to the clipboard. In order to use the image you just need to paste it into another application or document. It's like the Microsoft Office 97/2000/XP tool bar. You can move the tool
