My issue comes into play when I press the button and it doesn't show anything. No errors but no data either. However, if I use Label1.Text = "hi"; It works fine. I want to output the data to the Label. I've looked at other similar questions but there were no clear answers for what I am looking for. A: Controls that have been created in the Page Load event have their properties set before they are rendered. So you need to do the work as early as possible like on PreInit or Init: protected override void OnInit(EventArgs e) { base.OnInit(e);
